

# → Scope 3 Carbon Roadmap

## Our Priority Interventions:

- 1) Phase out fossil fuel boilers
- 2) Reduce embodied carbon of goods sold
- 3) Improve energy efficiency of goods sold
- 4) Switch to lower impact refrigerants
- 5) Decarbonise Scope 3 transportation

Scope 3 Carbon Footprint: 14.29m

Lobby Government: for accelerated plans & support for Commercial Gas Boiler Phase Out.

Supplier Forums Launched: Different Forums for different product categories.

Scope 3 Carbon Internal Working Group Formed.

Formal letter to all suppliers: outlining our NZC plans and requesting support.

Review & Revise Supplier Commitment on Carbon.

40% of own brand products embodied carbon is known and available externally - as per Construct Zero Framework.

100% of own brand products embodied carbon is known and available externally - as per Construct Zero Framework.

Carbon Footprint: 63% reduction

Internal BSS Carbon Focus group launched: accelerating BSS NZC Scope 3 plans.

New Online Risk Assessment questions: asking for Carbon Roadmaps and SBT approved targets.

Note: Legislation change - No gas boilers in new domestic buildings.

Note: No new domestic gas boiler installations by 2035.

← Scope 3 Reassessment conducted annually. →

← Scope 3 Working Group: This group will be focusing on the products and services that TP Group will be offering to reduce carbon in our supply chain. →

Note: Interim targets will be added during 2022.
